

## **POLICY REGARDING RECREATIONAL ACTIVITIES ON DISTRICT PONDS**

The Bella Vida Community Development District (the “District”) owns, operates and maintains eleven (11) stormwater management ponds (the “Ponds”) within its boundary. The Ponds are components of the District’s surface water management system and are designed to help address stormwater run-off and overflow. They are not intended for fishing, boating, or swimming activities. Accordingly, it is the District’s policy to prohibit fishing, boating, swimming or other recreational activities on or near the Ponds for any purposes other than for maintenance or repair of such Ponds by the District or its contractors or assigns.
